COPIES!

THE NEW FRANKEL PROCESS KEM-FAX

**KEM-FAX . . . PRODUCES OVER 100 DRY SHARP COPIES FOR
LESS THAN 1/2¢ EACH . . . IN SECONDS . . . YOU NEED
ONLY A THERMAL COPIER AND A SPIRIT DUPLICATOR.**

Kem-Fax is fast and easy • Slip your original material and the Kem-Fax into a carrier and run it through a thermal copier.

Kem-Fax is low-cost • Then put the Kem-Fax Master on a spirit duplicator and run over 100 copies in just 50 seconds.

FRANKEL'S KEM-FAX PROCESS SPEEDS REPRODUCTION OF TYPE HANDWRITING, DIAGRAMS AND ILLUSTRATIONS ON REGULAR

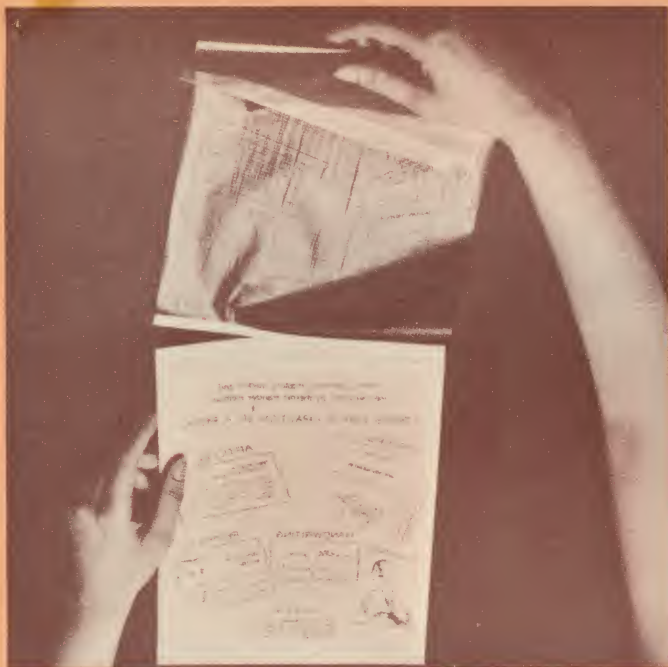

Two steps to produce copies — in only 50 seconds. The Kem-Fax process is an entirely new method of transferring original copy work to a spirit duplicating master by thermographic means — two widely used office machines are required — a spirit duplicator and a heat transfer copier.

THE KEM-FAX method of spirit reproduction is simple and easy to use. Anything that will thermofax can be copied on Kem-Fax.

KLEAN-FAX

COPY PAPERS

for use on thermal machines

FRANKEL MANUFACTURING COMPANY
285 Rio Grande Blvd.
DENVER, COLO. TEL. 266-3871

Frankel Manufacturing Company also offers the most complete line of thermal papers and allied supplies on the market today.

A. KLEAN-FAX Regular paper for copying on a heat thermal machine. Easy to use either opaque or translucent sheets in Buff, White or Yellow — non pressure sensitive.

1. A variety of papers that makes any job easy.
2. Copies under widest range of temperatures of any paper on the market.
3. Makes permanent non-fading copies.
4. Clear — sharp — distinct copies.
5. Will not harm machines and can be written on with pen, pencil or ball point pens.
6. Easy to file — will not curl.
7. Less waste than with any other paper.

KLEAN-FAX can be furnished in a heavy weight back copy sheet, addressing sheet with perforated labels, gummed back sheet without perforations and is made in an economy as well as top quality sheets.

KLEAN-FAX is also now available in a laminated film sheet especially designed for the discriminating user.

B. KLEAN-FAX SYSTEMS PAPERS provide a cheap and efficient method of producing multiple copies. The KLEAN-FAX SYSTEMS PAPERS require a thermal copy machine. The KLEAN-FAX "O" paper serves as a master. You can write, draw, print or type on this master any message, information, picture, etc., that you want. The "O" paper (which will make up to 75 good copies) is then used in conjunction with our special copy paper "C" or "CT" to produce copies. The "C" paper is white and bond weight, while "CT" is yellow and lighter weight.

There is no better or cheaper way of producing multiple copies than with KLEAN-FAX SYSTEMS PAPERS.

C. KEM-FAX Type "D" purple, blue or black thermal Spirit units. These KEM-FAX units produce over 100 dry sharp copies for less than ½¢ each — in seconds — you need only a thermal copier and a spirit duplicator.

1. KEM-FAX is fast and easy — slip your original material and a KEM-FAX Type "D" unit into a carrier and run it through a thermal copier. Complete directions accompany each box of KEM-FAX units.
2. Take the KEM-FAX master, place on a spirit machine and run over 100 copies in less than 50 seconds.
3. KEM-FAX Type "D" provides complete cleanliness in master preparation and saves untold time. Anything "FAXABLE" can be put on a KEM-FAX thermal spirit unit.

D. KEM-FAX #101 OFFSET THERMAL UNITS. Two steps to produce copies — in only 50 seconds. The KEM-FAX Thermal Offset process is an entirely new method of transferring original copy work to an offset master by thermographic means — two widely used office machines are required — an offset duplicator and a heat transfer copier.

The KEM-FAX method of offset reproduction is simple and easy to use. Anything that is faxable can be copied on KEM-FAX #101 offset.

E. KEM-FAX OVERHEAD TRANSPARENCIES The KEM-FAX Transparency is designed to produce a positive projection type film transparency by exposing on a thermographic dry copier via the reflex method. The mylar carrier is used in running the special KEM-FAX unit through the thermal machine. The unit actually consists of a sheet of plastic attached to a special carbonized sheet. These transparencies provide the sharpest overhead pictures of any transparencies on the market. The picture contrast on these transparencies is unbelievable. Easy to use — permanent type — these transparencies can also be used as an original on white print equipment.

All Frankel products are guaranteed to give 100% satisfaction. Send for additional information and prices today.
